---

Passionate developer with interests in web technologies, video games design and operating systems. Always looking to learn and develop new skills to improve myself and empower projects. Writes and maintains open source projects. Has worked with Rust for about 2.5 years, and TypeScript/JavaScript for about 1.5 years.

## EXPERIENCE

**Nabit**                                                                 https://nabit.vn
Developer                                                            Aug 2023 - *present*

- Web-based management system for gas retailers, warehouses and wholesalers.
- Powered by Angular for the frontend, .NET Core for the backend, and Microsoft SQL Server for the database.
- Powerful management features, with connections to multiple e-invoice systems for instant invoice management.

**Tachi**                                            https://github.com/TNG-dev/Tachi
Maintainer                                                           Aug 2022 - *present*

- Implemented and currently maintaining maimai DX for Tachi, an open-source score tracker website for 3M+ arcade scores and 3K+ users.
- Utilizes TypeScript and JavaScript to scrape and parse data for music database and importing scores.

## EDUCATION

**University of Science and Technology of Hanoi**                Hanoi, Vietnam
Information and Communication Technology                     Oct 2021 - *present*

## HOBBIES AND INTERESTS

I'm interested in art and music. I've been playing rhythm games semi-competitively for about 5 years. Recently, I've taken an interest in mechanical keyboards and rhythm games controller design. I'm also a part of osu!'s tournament community, having been participant and staff in many tournaments since 2020.
